ABSTRACT

This study investigated library learning resources and needs in a ten county area which coincides with Southern Oklahoma Development Association and Oklahoma Planning District Number Four. A variety of data sources were utilized but the principal data source was of a survey nature gathered by an interviewer. Conclusions reached include the following: (1) The greatest concentration of learning resources in this region is in the public schools with library books and librarians leading the list followed by audio-visual materials and equipment with public libraries providing the second greatest concentration of resources; (2) Respondents seemed to have no systematic basis on which to establish needs but expressed needs seemed to follow resources; (3) respondents tended to express satisfaction with present resources even though they may be meager; (4) Present delivery of learning resources in this area seems to be based on political boundaries and associated with funding and administration patterns; (5) Innovative delivery systems seem to be working but are hampered by funding problems; (6) Fragmentation and isolation of resources in this area point to the need for more coordination, planning, cooperation and more efficient delivery of library-learning resources possibly on a regional or area basis. ABSTRACT

TITLE: RURAL LIBRARY NEEDS AND RESOURCES WITH IMPLICATIONS FOR THE DEVELOPMENT OF A MODEL FOR THE DELIVERY OF LIBRARY AND LEARNING RESOURCES

INSTITUTION: EAST CENTRAL STATE COLLEGE, ADA, OKLAHOMA

CONTRACT: #OEC-6-72-070-(509)

PRINCIPAL INVESTIGATOR: ROY T. MAXWELL, ED. D.

This study investigated library learning resources and needs in a ten county area which coincides with Southern Oklahoma Development Association and Oklahoma Planning District Number Four. A variety of data sources were utilized but the principal data source was of a survey nature gathered by an interviewer. Conclusions reached include the following:

1. The greatest concentration of learning resources in this region is in the public schools with library books and librarians leading the list followed by audio-visual materials and equipment with public libraries providing the second greatest concentration of resources;
2. Respondents seemed to have no systematic basis on which to establish needs but expressed needs seemed to follow resources;
3. Respondents tended to express satisfaction with present resources even through they may be meager;
4. Present delivery of learning resources in this area seems to be based on political boundaries and associated with funding and administration patterns;
5. Innovative delivery systems seem to be working but are hampered by funding problems;
6. Fragmentation and isolation of resources in this area point to the need for more coordination, planning, cooperation and more efficient delivery of library-learning resources possibly on a regional or area basis.

Title: Rural Library Needs and Resources with Implication for the Development of a Model for the Delivery of Library and Learning Resources--Final Report, August 1973

Contract Number: OEC-6-72-0730-(509)

Project Director: Dr. Roy T. Maxwell (462-48-9087)

Contracting Agency: East Central State College, Ada, Oklahoma

Duration of Project: March 15, 1972 - September 15, 1973

SECTION I

Statement of the Problem - In spite of modern technology which has revolutionized communication, learning, information processing, information storage and retrieval as well as information dissemination, much of rural America continues to "get by" with the same type of inadequate fragmented library facilities which were common 50 years ago. This research project raises three questions about library resources and learning needs in rural areas. The first question is "What learning resources are available in rural areas?" The second question is "What learning and informational needs are not currently being met by present resources?" The third question is "How do areas which have had special projects compare with areas which have not had such programs?"

For several years, categorical funding programs have made huge sums of money available to various institutions such as elementary schools, secondary schools, colleges and universities, and public libraries for materials and facilities for libraries. However, it appears that these programs have not been sucessful in bringing about the intended change in library and learning resources. Although more materials are available, their utilization is hampered by antiquated delivery systems, concentration in specific geographical areas or in specific institutions and lace of consistent quality of materials. In fact, data are not available to determine the quality of library materials and services in rural areas. Institutions continue to express a need for more funds to improve the quality of library materials and facilities. In the absence of research data, these funds continue to be forthcoming and continue to be spent for products which may or may not be contributing to the solution of the problem involved.

Accountability demands that researchers make a thorough study of rural library needs and resources. Although this will not provide a direct evaluation of present funding approaches, it will determine the extent to which needs are being met at the present time. This will provide an indication whether or not innovative approaches to the problem of delivery of library services are needed.

A review of the literature reveals some interesting things about the development of library services. First of all, the majority of learning centers have been established in metropolitan areas.[1] This not only means that we are doing less in the rural areas about learning centers but it also means that we know leas about rural library needs and resources.[2]

The fact is that the development of services has followed federal funding patterns and these services have been developed within existing organizational patterns rather than providing "integrated services."[3] Specifically, there have been numerous demonstration projects involving public libraries and the delivery of public library services to rural areas through bookmobiles and cooperative library arrangements. Also, there have been numerous demonstrations of media, instructional or learning centers but these have been developed for elementary and secondary schools. Further, many of these are for narrow user groups.[4] Regional

Medical Programs have resulted in increased library services for hospitals. College library services have been improved through federal funds in this area. This seems to have resulted in many inequities as well as unnecessary duplication. In fact, there are so many different programs under the control of so many different institutions that it is very difficult to determine what needs and resources are available in rural areas.

Also, a search of the literature did not yield a demonstration project which "put it all together" and provided for integrated services instead of public library services, law library service, elementary and secondary school library services, and college library services. The need studies which have been done have been narrow in scope and specifically tied to the federal or state funding program involved. The present study is different from preceding projects because it is comprehensive in nature and has implications for developing coordinated services. The present project also involves a unique opportunity to compare innovative and traditional programs and evaluate the overall impact of the respective approaches. The first objective of this project is gather data regarding resources and needs in the following areas: a. Library materials and services; b. basic adult education and continuing education; c. testing, evaluation and counseling services for adults and youth; d. special and remedial educational services, learning disabilities and handicapped; e. audio-visual equipment and materials; f. medical information and educational services. The second objective of this study is to determine what learning and informational needs are not currently being met by present resources. The third objective is to compare learning resources and need in areas which have access to innovative learning library resources with areas where such services are not available.

Target Area - The rural area selected for this project is the ten-county district which coincides with the Southern Oklhaoma Development Association district and official Oklahoma State Planning Region #IV. This area covers 6,833 square miles and has a population (1970 census) of 163,997. Of that total 4.2% is Negro and 4.6% is American Indian. The median educational attainment is a grade level of 8.8. Unemployment averages 7.1% with 44% of the families having an income of $3,000 or less. It is predominatly a rural area with Ardmore, 21,915 population, the largest town.

This target area was selected because it contains a unique combination of the new and the old in library and learning resources. Six of the counties in this ten-county area are affiliated with the Chickasaw Library System which is a public library delivery system that uses bookmobiles to disseminate information and materials. Since there are four counties in this target area which are not a part of this system and there are many institutions such as schools and colleges which do not participate directly this will allow a comparison of one innovative delivery system with the traditional pattern of dissemination of library and learning resources.

Procedures for Gathering Data

Sources of Data - The first few weeks of the project were spent in organizing the research team and in making contacts with individuals who would have the information that would be needed for the project. Individuals from the Chickasaw Library System, the Oklahoma National Library, the Oklahoma Department of Libraries, the Oklahoma Department of Education, Valley View Hospital, Southern Oklahoma Developmental Agencies, the Oklahoma Department of Special Education, East Central State College Library, and the Regional Guidance Center III were contacted regarding the proposal as sources of information. One immediate probelm that developed was that by the time all contacts were made, the school year had come to an end and direct information from the schools was not available from enough schools to make it profitable in that aspect. Considerable time had been spent in discussion before the project was proposed. Yet upon contacting these agencies after the proposal had been started, there was still considerable difficulty in determining what the most relevant source of information might be. Several questions arose concerning possible sources of information, which needed to be included. These sources of data are discussed in more detail in chapter two. These sources of data can be categorized as being statewide, regional, or local. Many of the agencies involved in the planning of this project also were in a position to provide data regarding resources and needs.

Instruments for Data Gathering - Two basic approaches are used in gathering data for this study, the first approach is to take data in the form already available from state agencies such as the State Department of Education or the State Library. This generally involves published annual statistical reports. Some work had already been done on public libraries in six of the counties. The other approach is to develop and administer special questionnaires. A total of three questionnaires have been developed. These questionnaires are in chapter three and are discussed in more detail there.

Procedures for Analyzing Data - These procedures involve description, graphic presentation of results and statistical analysis. Chapter four contains a description of library learning resources and needs. Chapter five discusses needs not currently being met by present resources. Chapter six involves an analysis of differences in the area. Conclusions and recommendations from the data analysis are presented in the final chapter.

SECTION II

SOURCES OF DATA

The basis concept dealt with in this study is "Library-learning resources". This is a broad term and involves a number of agencies. Initial planning indicated that there are Statewide, regional and local agencies providing learning resources. Most of the Statewide agencies are of a co-ordinating nature. Some provide services directly but most provide their services through local agencies such as schools, County Health Department, and County Department of Institutions, Social and Rehabilitative Services. Some Regional agencies are of a planning and co-ordinating nature and others provide direct services.

Table 1 provides a list of Statewide, regional, and local agencies which involve some aspect of learning resources in this ten-county area.

TABLE 1

AGENCIES RELATED TO LIBRARY-LEARNING RESOURCES

I. Statewide Resources
  A. Oklahoma Department of Public Libraries
  B. Oklahoma Department of Education
  C. Oklahoma Department of Health
  D. Oklahoma Department of Institutions, Social and Rehabilitative Services
  E. University of Oklahoma Medical Center

II. Regional Resources
  A. State Planning District number four (Southern Oklahoma Development Association
  B. Chickasaw Library Board
  C. Ardmore Library Learning Resources Planning Grant
  D. Regional Medical Program
  E. Regional Guidance Center #3

III. Local Resources

- A. Atoka County
    1. Atoka High School
    2. Bentley Elementary School
    3. Caney School
    4. Farris Elementary School
    5. Harmony Elementary School
    6. Lane Elementary School
    7. Mamie Johnson Elementary School
    8. Stringtown Public School
    9. Thunderbird Elementary School
    10. Tushka Public School
    11. Atoka County Law Library
    12. Atoka Memorial Hospital Library
- B. Bryan County
    1. Achilles Public School
    2. Bennington Public School
    3. Blue Public School
    4. Caddo Public School
    5. Calera Public School
    6. Colbert Junior & Senior High School
    7. Colbert Ungraded Primary
    8. Durant Middle School
    9. Durant High School
    10. Durant Elementary Material Center
    11. George Washington Elementary School
    12. Northwest Heights Elementary School
    13. Silo Public School

14. Yuba Public School
15. Durant T.V. Center
16. Special Education
17. Bryan County Law Library
18. Bryan County Memorial Hospital Library
19. Southeastern State College Library

C. Carter County

1. Berwyn Public School
2. Dickson Public School
3. Fox Public School
4. Graham Public School
5. Lone Grove Public School
6. Springer Public School
7. Wilson Elementary School
8. Wilson Junior & Senior High School
9. Chickasaw Library System
10. Ardmore Hospital Library
11. Bio-Medical Library
12. Carter County Law Library
13. Memorial Hospital Library
14. Vo-Tech Center
15. Healdton High School
16. Ardmore Public Libraries
17. Ardmore City School

C. Coal County

1. Coalgate Elementary School
2. Coalgate Junior & Senior High School
3. Olney Public School

    4. Tupelo Public School
    5. Coal County Public Library
    6. Coal County Law Library
    7. Mary Hurley Hospital Library

E. Garvin County

    1. Pernell Public School
    2. Lindsay School
    3. Maysville School
    4. Paoli School
    5. Pernell School
    6. Pauls Valley
    7. Stratford Public School
    8. Walker School
    9. Whitehead School
    10. Wynnewood School
    11. Lindsay Community Library
    12. Wynnewood Public Library
    13. Hilltop Library
    14. Pauls Valley Public Library
    15. Garvin County Library

F. Johnston County

    1. Bromide Elementary School
    2. Coleman Public School
    3. Connerville Public School
    4. Fillmore Public School
    5. Mannsville Public School
    6. Milburn Public School

7. Mill Creek Public School
8. Murray State College Library
9. Ravia Public School
10. Tishomingo Memorial Elementary School
11. Tishomingo Junior & Senior High School
12. Wapanucka Public School
13. Johnston County Memorial Hospital Library

G. Love County

1. Greenville Elementary School
2. Leon Public School
3. Thackerville Public School
4. Turner Public School
5. Love County Health Library
6. Love County Law Library

H. Marshall County

1. Kingston Elementary School
2. Kingston Junior & Senior High School
3. Madill Elementary School
4. Madill Junior & Senior High School
5. Madill City Library
6. Marshall County Memorial Hospital Library
7. Travertine Nature Center Library

I. Murray County

1. Davis Elementary School
2. Davis Junior & Senior High School
3. Dougherty Public School
4. Oklahoma School for the Deaf
5. Sulphur High School
6. Washington Elementary School

    7. Davis Public Library
    8. Medical Library

J. Pontotoc County
    1. Ahloso Public School
    2. Allen Public School
    3. Byng Public School
    4. Frances Public School (Byng Annex)
    5. Homer Public School
    6. McLish Public School
    7. Roff Public School
    8. Stonewall Public School
    9. Vanoss Public School
    10. Ada Public Library

SECTION III

MEASUREMENT TECHNIQUES

PRELIMINARY EFFORTS

In obtaining data regarding library-learning resources and needs it was necessary to decide what information is relevant and how to measure it. The initial approach was to send an "unstructured questionnaire" to the schools with the six areas of this study listed followed by an opportunity to list needs and resources. This data gathering instrument is found in table 2.

TABLE 2

QUESTIONNAIRE

1. Name of Institution or Agency:
2. Address:
3. Name and Title of Person Providing Information:
4. Directions: Please list any learning resources and learning needs that your institution may have under the following categories:

I. Library materials and services

    A. Learning and information resources.

        1.

        2.

        3.

    B. Learning and information needs

        1.

        2.

        3.

II. Basic adult education and continuing education

A. Learning and information resources
  1.
  2.
  3.
B. Learning and information needs
  1.
  2.
  3.

III. Testing, evaluation and counseling services for adults and youth
A. Learning and information resources
  1.
  2.
  3.
B. Learning and information needs
  1.
  2.
  3.

IV. Special and remedial educational services, learning disabilities and handicapped.
A. Learning and information resources
  1.
  2.
  3.
B. Learning and information needs
  1.
  2.
  3.

V. Aduio-visual equipment and materials

A. Learning and information resources

1.

2.

3.

B. Learning and information needs

1.

2.

3.

VI. Medical information and educational services

A. Learning and information resources

1.

2.

3.

B. Learning and information needs

1.

2.

3.

Out of 217 schools in this ten county area, only three completed this questionnaire. Two conclusions were drawn from these results. First of all, it was evident, that this questionnaire was too unstructured to be meaningful to participants. Furthermore, the meager response suggested that it would be necessary to have an interviewer obtain information rather than rely on questionnaires being returned by mail.

Other preliminary efforts to obtain data included information available from state or overall co-ordinating agencies. These data were in the form of published reports.

From these preliminary inquiries it was learned that surveys of Public Schools and Public Libraries had been made some time prior to this study on this ten-county region.

The questionnaires used in these earlier studies were modified and expanded for the purpose of the present study.

GATHERING DATA FROM SCHOOLS

The questionnaire completed by the schools is found in Table 3.

TABLE 3

Name of School ______________________ Address ______________

Name of Person Providing Information ______________ Position ______________

Directions: In the space below please indicate present resources and needs:

	Present	Needed
1. Number of Librarians full or part time equivalent		
2. Audiovisual Personnel or part time equivalent		
3. Aides for library or audiovisual		
4. Number of 16mm Films owned by District		
5. Number 8mm Films owned by district		
6. Number of filmstrips		
7. Number of Periodicals subscribed to		
8. Number of recording owned by district		
9. Number of cassettes or other magnetic tapes		
10. Number of microfilms		
11. Number of 16mm projectors		
12. Number of 8mm projectors		
13. Number of slide projectors		
14. Number of microfilm readers		
15. Number of copy machines		
16. Number of computers		
17. Number of television sets		
18. Number of television classes		

19. Total number of library and reference books in entirety ____________

20. Number of Adult education classes ____________

21. Number of Career education classes ____________

22. Number of certified guidance counselors are available ____________

A. Full time ____________

B. Part time ____________

C. Other assignments ____________

23. What health services are offered

A. Visual Tests ____________

B. Hearing tests ____________

C. Innoculations ____________

specify

D. Health information talks

1. Sex education ____________

2. Health education ____________

3. VD Education ____________

4. Other ____________

E. Health films

1. Sex Education ____________

2. Health education ____________

3. VD education ____________

4. Other ____________

24 Number of Nurses

A. Full time ____________

B. Part time (may be stated in hours and # of visits such as once a week for 2 hours) ____________

C. Employed by

County ____________ School System ____________ Other ____________

25. What Feredal programs do you have now?

26. What Federal programs do you anticipate?

27. What resources do you have that are not mentioned above?

28. What resources do you need that are not mentioned above?

As can be seen from an analizsis of the content, this questionnaire gathers data regarding library personnel, audio-visual materials and equipment, health services and Federal Programs.

This questionnaire served as an interview schedule which was completed as much as possible during a brief interview. In instances where it was necessary to collect further data to complete the form, the form was left to be returned by mail.

After preliminary data were obtained, members of the Chickasaw Library System requested that data regarding card-catalogue be obtained. This necessiated sending a supplementary questionnaire by mail. This supplementary questionnaire is found in Table 4.

TABLE 4

Thank you for completing the questionnaire regarding library and learning resources in your school. In preparing the questionnaire, we did not include two items of information which we find that we need. Please answer the two questions at the bottom of this page and return this letter in the envelope provided.

Sincerely,

Roy T. Maxwell, Ed. D.
Project Director

Special Libraries - The questionnaire or schedule for Public Libraries is found in Table 6. It is a revision of a questionnaire used in studing special libraries in Arizona. The chief difficulty with this schedule seemed to be its length.

TABLE 6

LIBRARIES QUESTIONNAIRE
March 1973

This Questionnaire was developed to survey the resources and needs of various libraries in Oklahoma.

Your cooperation is completing this Questionnaire and returning it to the above address by April 10, 1973 will be appreciated.

Results of this Questionnaire will be made available in the future through Educational Resources Information Center (ERIC)

INSTRUCTIONS

1. Not every question will apply to your library situation. The Questionnaire was designed to apply to all types of special libraries. If an item does not apply to your situation please enter "N.A." (not applicable) in the appropriate space.
2. List each library separately. Submit separate reports for each library in a system. Additional copies of this Questionnaire are available at the above address.
3. Use additional sheets whenever necessary. Please refer to the identifying item number when doing so.
4. Please note that all financial information will be kept confidential and that no individual or total figues will be identified. The figures will be used only in unnamed statistical groupings. Financial information, staff and salaries will be destroyed when this data has been gathered and analyzed.
5. Please indicate any special exceptions on the Questionnaire if possible. Otherwise indicate these exceptions on a separate sheet, noting the item number for reference.
6. The abbreviation F.Y. means Fiscal Year . For the purposes of the statistical tabulation of this Questionnaire, the fiscal years begins on July 1, 1971 and ends on June 30, 1972.

PART I ORGANIZATION-SERVICE

A. IDENTIFICATION

1. a. Name of Library ____________

   b. Address (include County) __ ____________________

   c. Name of Organization ______ ____________________

2. a. Year Library Founded __________

e. Other (specify)								
(Maps, Pamphlets, charts, etc.)								

[1] See definition of fiscal year under Instruction #6, page 1.

[2] Count as original material would be counted.

[3] Volume: A physical unit of any printed, typewritten, handwritten, mineographed (duplicated) or processed work contained in one binding or portfolio, hard or soft bond which has been catalogued, classified, and/or made ready for use.

[4] Count by individual reports

[5] Count by individual item.

B. PERIODICALS

1. Report below number of periodical titles currently received exclusive of duplicate copies

   a. By purchase (subscription or membership)

b. By gift

c. Through exchange

2. Indicate the number of titles which are retained in full in back files*

Period of Time	Standard Materials	Micro-Reductions
a. At least one but not more than five years (include new subscriptions intended to be retained 5 years)		
b. More than five years but not indefinitely		
c. Indefinitely		

*Titles which are no longer received should be included

PART III PERSONNEL

A. STAFF AND SALARIES (see Instruction 5, page 1)

1. Filled and vacant positions (exclude maintenance)

(Use separate sheet if needed)	Professional Library	Professional Other	Non-professional
a. Number of full-time position filled			
b. Number of part-time positions filled (In-full-time equivalents)			
c. Total number on library staff (In full time equiv)			
d. Number of budgeted positions vacant			
e. Number of additional staff needed but not budgeted			

2. Staff qualifications and assignements

a. Number of full-time staff with library science degree ___Minor ___

b. Number of part-time staff with library science degree ___Minor ___

c. Number of staff who have received in-service training __________

Number of hours _____ Agency ______________________________

d. Nr. of staff excellent __: Nr. of staff good __: Nr. of staff Satisfactory __: Nr. of staff Unsatisfactory __.

e. Total number of hours per day librarian is assigned to library __

f. Total number of hours per day librarian is assigned other duties __

What duties? ____

3. Staff Salaries (In the space below, list position and salary of employees)

PART IV OVERALL EVALUATION (RATE THE GENERAL AREA INVOLVED)

A. PHYSICAL FACILITIES

1. Rating

   a. excellent;___ good:___ Satisfactory:___ Unsatisfactory ___.

2. needs(in the space below please indicate what is need to improve your facilities.)

B. SERVICE

1. Rating

   a. Excellent:___ good:___ Satisfactory:___ Unsatisfactory___.

2. Need (In the space below pelase indicate what is needed to improve your facilities.)

C. CIRCULATION

1. Rating

   a. Excellent:___ Good:___ Satisfactory:___ Unsatisfactory___.

2. Needs (In the space below please indicate what is needed to improve circulation).

D. INTERLIBRARY COOPERATION

1. Rating

   a. Excellent:___ Good:___ Satisfactory:___ Unsatisfactory___.

2. Needs (In the space below please indicate what is needed to improve interlibrary cooperation).

E. BIBLIOGRAPHIC AND TECHNICAL SERVICES

1. Rating

   a. Excellent:___ Good:___ Satisfactory:___ Unsatisfactory___.

2. Needs (In the space below please indicate what is needed to improve bibliographic and technical services).

F. EXPENDITURES (TOTAL BUDGET

1. Rating

   a. Excellent:___ Good:___ Satisfactory___ Unsatisfactory ___.

2. Needs (In the space below please indicate what is needed to improve budgetary needs if rating is less than excellent).

G. EQUIPMENT IN GOOD OPERATING CONDITION

1. Rating

   a. Excellent:___ Good:___ Satisfactory:___ Unsatisfactory___.

2. Needs (In the space below please indicate equipment needs).

H. BOOKS AND MATERIALS COLLECTIONS

One important source of data included material published in annual reports, catalog of holdings or similiar documents.

SECTION IV

RESOURCES AND NEEDS

The survey forms offered provided the opportunity for agencies providing information to indicate present resources as well as needs. These results are reported separately for each resource by county and total.

Code used on table in section IV: First number indicates County; Second number indicate Name of Institute; Third number indicate type of questionnaire used - a. School questionnaire, b. Library questionnaire, c. Hospital questionnaire. Fourth number indicates type of Institute - a. School, b. Library, c. Hospital, d. Other.

LIBRARIANS

In the ten county area, which includes two hundred sixteen schools, a total of eighty eight schools provided data. Twenty seven other agencies,which includes Law Libraries, Hospital Libraries, Public Libraries and other Libraries provided data.

ATOKA COUNTY

A total of twelve institutions reported from Atoka County. These included: six Elementary Schools, three Public Schools, one High School, one Law Library, and one Hospital Library.

TABLE 7

SOURCE	PRESENT	NEED	SOURCE	PRESENT	NEED
1-1-a-a	1	0	1-7-a-a	0	0

TABLE 299

REPORT FROM COUNTY SUPERINTENDENT'S OFFICE

A. QUESTIONNAIRE FROM LOVE COUNTY DEPENDENT SCHOOLS D-3 & D-8, LOVE COUNTY SUPERINTENDENT'S OFFICE

1. Learning and information Resources: Libraries in both Elementary Schools
2. Learning and Information needs: The school children need the availability of a library in school work. All the students in our elementary schools need to be tested periodically. It is in this way that we see their achievements. The students also need evaluation and counselings.

TABLE 299 cont'

3. Special and remedial education services: Remedial Reading in both Schools.
4. Special and remedial education services needs: There is always slow readers in every school. Although we do not have a program for the handicapped in our schools, we do have remedial reading for the pupils who need this service.'
5. Audio-Visual equipment and materials: Audio-Visual equipment is available to all elementary schools.

B. QUESTIONNAIRE FROM JOY AND DOUGHERTY ELEMENTARY SCHOOL, MURRAY COUNTY

1. Library learning and information resources: We have nice libraries in both these schools with reference books, daily newspapers and periodicals. We also have a good audio-visual program at both schools. 4-H Club and Scout programs are also a part of the program.
2. Adult education learning and information resources: At Dougherty the Community Action program has a program for adults sponsored by Federal Funds. All Adults are welcomed and encouraged to use our learning resources at both schools. We are also a member of the Chickasaw Library which makes a mobile stop at both schools once each month.
3. Testing, evaluation and counseling services: Both schools are using standard achievement tests and evaluating. Through Title I Funds we have Remedial program in both schools.

C. QUESTIONNAIRE FROM COUNTY SUPERINTENDENT'S OFFICE, ADA

1. Library materials and services: Film library consisting of 16mm sound films and filmstrips. We order and distribute state textbooks to the dependent schools of the county.
2. Library learning and information needs: Update the film library; the ones on file are old and in bad condition.

All Schools are required to vote a 35 mill levy

There is a decrease in the number of schools filing Attendance Reports due to the 10 per cent Indian Enrollment qualifying clause. There are 26 schools have 40% or moe Indian ADA, 13 of these schools are 50% or more. NOTE: This Enrollment and Attendance Table is for the school year 1971-72, on which the payments for 1972-73 will be made.

SUMMARY OF RESOURCES

In summary, respondents identified library books as the greatest learning resource in this ten county area. Respondents indicated the presence of 611,222 library books. Of this total, 256,300 are located in Public Libraries; 337,154 in school libraries and 17,768 in special libraries. This reveals that the greatest concentration of library books in this ten-county area is in public schools (337,154) and the second largest concentration of library books in public libraries (256,300). An interpretation of these data should take into account that a total of 87 public schools reported and only 11 public libraries reported. Corresponding to the resource of library books is library personnel. Public schools reported a total of 76 librarians; and 271 aides while public libraries reported a total of 12 librarians and 36 aides. The special libraries such as medical and law libraries did not indicate that they have individuals with the job title of librarians.

In addition to library books, there is the related resource of periodicals. Respondents indicated that they subscribe to a total of 3,889 periodicals. Out of this total, 2,301 periodicals are in public schools, 191 in public libraries and 1,397 in special libraries.

Audio-visual resources are viewed by respondents as second to library books and periodicals in learning resources. Sixteen mm film seems to be the greatest audio-visual resource (4,848). The bulk of the 16mm film is in the public schools with 4,295 followed by public libraries with 530. Schools have 14,151 filmstrips and public libraries 929.

Cassettes are also an important resource with respondents indicating a total of 2,894 in their possession. Only a small percentage of public schools reported that they have audio-ivsual personnel and no public libraries or special libraries reported that they have audio-visual personnel.

The majority of respondents have 16mm projectors (74%) with a total of 249 reported. Also 64% of respondents report that they have slide projectors with a total of 289 reported.

Copying machines are an important audio-visual resource with 77% of respondents indicating that they have them and a total of 225 reported.

Guidance counselors are reported as a resource of the schools. A total of 28 full-time and 41 part-time counselors were reported. A number of specialized guidance services are provided in this ten-county guidance center with headquarters in Ada. Special Education resources are provided chiefly in the form of classes for the educable mentally handicapped with a total of 39½ such classes in this ten-county area. There are also 15 classes for trainable mentally retarded. Also there are 9 classes for children with learning disabilities.

Special education resources are also concentrated in two special projects: one of these is located in Ardmore and the other in Ada. These provide a wealth of material and resources in these two areas.

SECTION V

UNMET NEEDS

Two different dimensions of needs were tapped by this study. The first was "expressed need." Respondents were given an opportunity to indicate needs as well as resources. These are operationally considered as "felt needs." These needs were presented in Section IV and will be summarized and discussed in subsequent paragraphs. The second dimension of need involves the "lack of a resource." If the items in the data gathering instruments can be considered as important learning resources, then the absence of such a resource can operationally be defined as an indication of a need. For the purpose of this study, these needs are referred to as "apparent needs.".

Felt Needs - The most significant finding of this study is the fact that respondents seem to be fairly well satisfied with present resources. The greatest felt need was for librarians with 16% of respondents indicating a need for additional library staff and the total number reported to be needed was 35. As can be seen in Table 328, 14% of the reporting institutions report no librarians or no need for librarians. This would mean that of the institutions having a library staff, 70% apparently consider their staffing adequate.

Along with librarians is the finding that 11% of reporting institutions feel a need for library aides. However, 47% of respondents report that they do not have any library aides and do not need any.

The data indicates a felt or expressed need for audio-visual materials and equipment in the form of cassettes (12%), filmstrips (11%), 16mm Projectors (10%). Also, there was an expressed need for audiovisual personnel.

A need for adult education and career education classes were expressed by 6% of the respondents. However 82% of respondents indicated that they do not have adult education classes and do not feel a need for them. Moreover, 86% indicated that they do not have career education classes and do not feel a need for them.

Lack of Resources or apparent need - The resource most lacking seems to be school nurses. An analysis of the data indicates that most schools utilize county public health nurses and do not feel a need for nurses on the school payroll.

There seemed to very little VD education or Sex education and very little interest in obtaining it.

As already reported, there is a lack of adult education classes and career education in this ten county area and little felt need by respondents for them.

Audio-visual personnel seem to be lacking as well as 8mm films, 8mm projectors, microfilm, and microfilm readers, television sets, and television classes.

There seems to be a shortage of counselors especially in elementary schools in this ten-county area.

Discussion of Needs - One of the most aparent things from this study is the implication that most of the respondents had no systematic way of determining needs. The majority of respondents seemed to be satisfied with what they have. This seemed to be the case even when there was a reported lace of resources.

SECTION VI

DISTRIBUTION OF RESOURCES

One objective of this study was to examine patterns of resources with implications for a delivery system. The most obvious and expected relationship is between size and resources. A Spearman Rho was computed between ranking based on size (1970 census) and ranking based on reported resources. A rho of .92 was obtained.

There are three "innovative" delivery systems of learning resources operating in this ten county area which merit consideration. These systems have to do with public library services, guidance services and medical information and services.

Public Libraries - as can be seen in Table 314, there are a total of nine public libraries in this ten county area. The Chickasaw Library System operates bookmobiles in six of the ten counties (Carter, Coal, Atoka, Johnston, Love and Murray). The headquarters for this system is located in the most densley populated county in the area (Carter). The remaining counties are comprised of the most sparsely populated areas. The Chickasaw Library System has a larger amount of resources (books, staff, and other learning materials) than any of the other libraries in the area but it serves a significantly larger population (73,022) in comparison to the library reporting the next amount of resources which services a population of 20,831. The Chickasaw Library Service is provided in those counties which have voted a tax to support the service. It would appear that this tax has been approved in counties which did not already have some type of public library serving the county. This program has also tended to be adopted in counties which have received a demonstration grant to provide the service for one year before asking for tax support.

Garvin County has one county library and city libraries in Pauls Valley, Lindsay, and Wynnewood. Pontotoc County is served by the Ada Public Library. Durant is served by the Robert Lee Williams PUblic Library. Marshall County is served by the Chickasaw System but it also has a public library not affiliated with that system. This means that there are public library facilities in all of the ten counties.

Theoretically, a rural area such as the one being studied could provide more expedient inter-library system. The present data bear on the question but does not answer it. There are more resources in the population centers which are not served by the Chickasaw system than is available to the Chickasaw System. If the library service is comparable then it would appear that some type of public library cooperative program would be more efficent. Unfortunately there is no ready measure of quality of service.

Regional Guidance Center - Psychological services are provided in this area by the Regional Guidance Center III with headquarters in Ada. Data are available on the Fiscal Year ended June 30, 1972. During this statistical year, services were extended to all of the counties in the region but five of the counties were served only five months. Services to individuals are available to all residents of the region who come to the headquarters in Ada for such service. Services to individuals are also provided to counties which provide financial support to the Center (Atoka, Bryan, Garvin, Murray, and Pontotoc). Consultative services are provided throughout the region to schools, and social service agencies working with people. Regional Guidance Center III seems to be hampered by funding patterns which require local matching support to obtain services.

Health and Medical Services - The bulk of public health information and services is provided by county health departments coordinated by a district health department.

The most innovative medical service in the region is the Regional Medical program operated by Valley View hospital. Area hospitals are connected by teleconference facilities which transeunt medical information. Also, various educational programs are transeunted including college-credit courses from East Central State College.

SECTION VII

SUMMARY AND CONCLUSIONS

This study involves a survey of library-learning resources in a ten county district which coincides with the Southern Oklahoma Development Association District and Official Oklahoma State Planning Region #IV. The bulk of the data were gathered by an interviewer using a survey approach. Three dimensions are involved in the study. The first aspect is the identification of library-learning resources. The second dimension involves identfication of needs not being met at the present time. The third aspect involves a comparison of resources in the area with implications for a delivery system.

The following conclusion may be reached from the present data:

1. The greatest concentrations of learning resources in this region is in the public schools with library books and librarians leading the list followed by aduio-visual materials and equipment with public libraries providing the second greatest concentration of resources;
2. Respondents seemed to have no systematic basis on which to establish needs but need patterns tended to follow resources with the greatest needs expressed for books, audio-visual materials, etc.;
3. Respondents tended to express satisfication with present resources even through they may be meager;
4. Present delivery of learning resources seems to be based on geographical boundaries and associated with funding and administration patterns;

5. Innovative delivery systems seem to be working but are hampered by funding problems;
6. Fragmentation and isolation of resources point to the need for more coordination, planning, cooperation and more efficient delivery of library-learning resources in this area.
